2. Start to Assemble & Connect

Install SATA hard disk into the enclosure

Pull out the HDD tray and follow the below steps to install SATA hard disk by screws.

Cable connection and power on ME-745K

First of all, if using the LAN service provided by ME-745K, please make sure your PC is networked. Then please connect LAN cable to the LAN port of the ME-745K and put the other end to the RJ45 of your network. Connecting the power cable, and power on ME-745K.

Or you can connect USB cable between your computer and ME-745K to use it as a simple external USB disk

3. Start to use sharing function of ME-745K over LAN

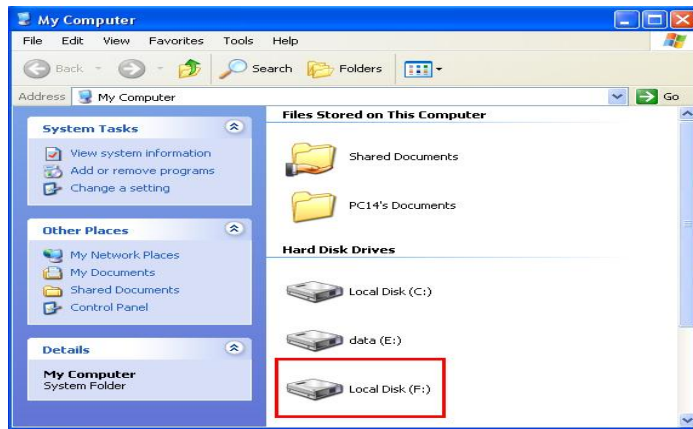

Install RallyStorage Program

Insert the CD into your PC and find RallyStorage WINXP vista 1201" for installation. Please double click to execute, and setup wizard will lead you to install this application program.

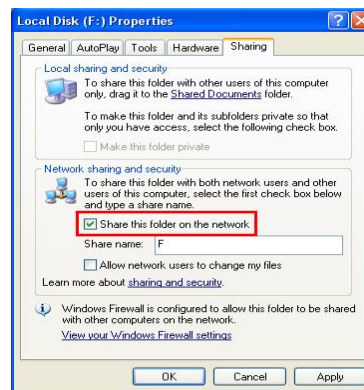

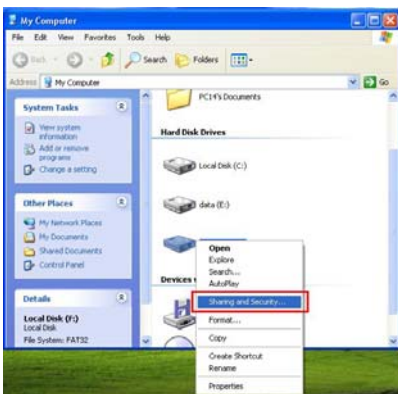

Executing the "Launch RallyStorage" to find out the disk over LAN

To discover the disk, please double click "Launch RallyStorage" icon from the desktop. Click "Search" to detect the disk. After the disk is detected, click "Connect" to mount it as a Local disk. You will find it from the "My Computer" now.

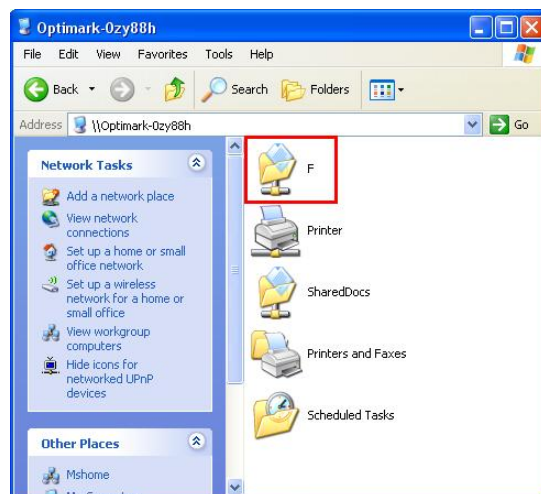

Share the disk to other users on the network

Step1. Right click the disk, choose the "Sharing and Security". **Step2.** Choose the Share the folder on the network. Then click the OK.

Step3. If you allow the other users to modify the files of the sharing disk, please choose the **Allow network users to change my files**.

Then you can see the disk appear on the "My Network Place". And now the other users can share the disk.

4. Remarks
